REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of features in the independent claims were not found in the prior art as follows: The prior art comprises load linked instructions that were linked to corresponding store conditional instructions and were dispatched for speculative execution if a instruction status of the location indicated for loading was invalid and storing reservations for execution where if the corresponding store conditional instruction completed the load linked was allowed to complete but if the store conditional instruction was not completed then the load linked instruction was not allowed to complete and was re-executed. However the combination of features in claims 1,13,18, that was not found in the prior art comprises: responsive to no valid reservation selecting speculative load-linked instruction for issue, wherein a reservation is established responsive to processing a load-linked instruction, and wherein a load-linked instruction is a load instruction that is architecturally defined to establish the reservation, and wherein a valid reservation is indicative that one or more bytes indicated by target address of the load-linked instruction have not been updated since the reservation was established and responsive to at least one valid reservation, not selecting the speculative load-linked instruction for issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Coleman whose telephone number is (571) 272-4163. The examiner can normally be reached on Monday-Thursday.
